- Legacy-Flutter:Your complete guide for IOS and Android Udemy Course 2023
- Python,complete guide Udemy course 2021
- Scientific-Technological Baccalaureate IES Los Alamos 2014

EXPERIENCE

Full Stack Developer in Astibot Ingeniería September 2023 to November 2023

In this job I was been develop a web app for Getafe's City with Angular in the Front , PHP in the back, and with an SQL database using MySQL.

Frontend

I worked with the layout of the website with the Bootstrap framework, the validation of form data, data extraction through the API for data visualization, creation of data graphs and navigation according to user roles.

Backend

I worked with the integration of data from external API to our database (ETL), creation of methods and API endpoints, for the different functionalities of the website, connection with SQL database.

Database

Creation of database model, Connection with API developed in PHP, Creation of events and triggers for website functionalities, Data queries to perform development tests.

Practice Developer Mill Aplicaciones Company, S.A (Bluumi) from March 2023 to December 2023

In this company I was training in hybrid technologies (Flutter), we formed a development team to create a Web application with Angular using Angular Material and Spring Boot, we also did some testing to test a web and Mobile application. We work all the time with Trello, a tool to promote Agile methodologies.
