ABOUT ME

Passionate Web Application Development Technician eager to forge a dynamic career aligned with my comprehensive studies and expertise. My unwavering enthusiasm for computing and programming fuels my continuous exploration of cutting-edge technologies. I am dedicated to leveraging my skills to drive innovation and create impactful solutions in the ever-evolving tech landscape. I am currently developing a personal project with Spring Boot on the backend, Angular for web and Flutter for Android and IOS devices

CERTIFICATES

- Advanced Training Cycle in Web Application Development (DAW) IES Camas 2023
- Spring Boot from Zero to Expert Udemy Course 2023
- Legacy-Flutter:Your complete guide for IOS and Android Udemy Course 2023
- Python,complete guide Udemy course 2021
- Scientific-Technological Baccalaureate IES Los Alamos 2014

EXPERIENCE

Freelance Web Application Developer | Pizzeria Martino February 2024 at present.

As a freelance web application developer, I've had the privilege of collaborating with Pizzeria Martino on an ongoing project aimed at developing a comprehensive web application to streamline operations and enhance the customer experience.

During this project:

- I designed and developed the backend using Java, in conjunction with a SQL database created and structured from scratch. I implemented specific procedures to optimize business logic and ensure efficient performance.
- I actively contributed to the frontend using JavaScript to deliver a dynamic and responsive user experience.
- I customized the appearance of the application using Bootstrap and CSS, ensuring an attractive and user-friendly interface that reflects Pizzeria Martino's identity.
- I maintained open communication with the client, continuously gathering requirements and adapting the project to meet their specific needs and expectations.

My contribution has been instrumental to the project's ongoing success. The resulting application not only meets but exceeds the client's expectations, significantly improving operational efficiency and enhancing the customer experience at Pizzeria Martino.

The project is currently in development, and the website can be accessed at www.pizzeriamartino.es.

EXPERIENCE

Astibot Ingeniería, Full Stack Developer September 2023 to November 2023

At Astibot Ingeniería, I spearheaded the development of a web application for Getafe's City. This involved utilizing Angular for the frontend, PHP for the backend, and MySQL for the SQL database.

Frontend:

- Collaborated on website layout using the Bootstrap framework.
- Conducted form data validation and extracted data via API for visualization purposes.
- Designed and implemented data graphs and user role-based navigation.

Backend:

- Integrated external API data into our database (ETL).
- Developed methods and API endpoints for various website functionalities.
- Established connection with SQL database.

Database:

- Designed the database model and connected it with the PHP-developed API.
- Implemented events and triggers to enhance website functionalities.
- Conducted data queries for development testing purposes.

Mill Applications Company, S.A (Bluumi), Practice Developer March 2023 to June 2023

During my tenure at Mill Applications Company, S.A (Bluumi), I received training in hybrid technologies, specifically Flutter. As part of a development team, we created a web application using Angular with Angular Material and Spring Boot. Additionally, we conducted testing for both web and mobile applications. Throughout the project, we utilized Trello to facilitate Agile methodologies.

This experience honed my skills in hybrid technologies and strengthened my proficiency in collaborative development practices.

DATA OF INTEREST

I am proactive at work.

Accustomed to working under pressure.

I work very well as a team.

Type B driving license and own car.

Management of any operating system.

Total availability.
